FOREWORD

AS-11 complements AC-10. Where AC-10 includes the personnel of the Board of Governors, councils, boards, and technical and regional committees, AS-11 includes the personnel of the Council on Codes and Standards (CCS), boards, and committees of the Codes; Standards; and Accreditation, Registration, and Certification Program. The information contained herein reflects the Codes and Standards committee membership and staff assignments as of July 23, 1996.

A Society activity of prime importance has been the development, promulgation, and administration of the Codes; Standards; and Accreditation, Registration, and Certification Program. In the ASME Constitution, Article C2.1 states:

C2.1.1 The purposes of this Society are to:

Promote the art, science, and practice of mechanical engineering and the allied arts and sciences;

Encourage original research;

Foster engineering education;

Advance the standards of engineering;

Promote the exchange of information among engineers and others;

Broaden the usefulness of the engineering profession in cooperation with other engineering and technical societies; and

Promote a high level of ethical practice.

In all professional and business relations the members of the Society shall be governed by the Code of Ethics as stated in the Society Policies.

C2.1.2 The Society may approve or adopt any report, standard, code, formula, or recommended practice, but shall forbid and oppose the use of its name and proprietary symbols in any commercial work or business, except to indicate conformity with its standards or recommended practice.

ASME has a unique organizational structure which provides a great deal of autonomy for its Codes; Standards; and Accreditation, Registration, and Certification Program, and yet provides the advantages inherent in a professional society of disinterested committees, boards, and councils that enhance due process. These inherent advantages result from the multifaceted purposes of the Society.

The Codes; Standards; and Accreditation, Registration, and Certification Program includes:

Council on Codes and Standards

Board on Accreditation, Registration, and Certification

Board on Council Operations

Board on Hearings and Appeals

Board on International Standards
 Board on Metrication
 Board on Nuclear Codes and Standards
 Board on Performance Test Codes
 Board on Pressure Technology Codes and Standards
 Board on Safety Codes and Standards
 Board on Standardization

Annually, the Board of Governors assigns the duties associated with the Codes; Standards; and Accreditation, Registration, and Certification Program to the Council on Codes and Standards (CCS). This Council is responsible for Codes and Standards planning; reflection of advancing technological changes and safety needs in the structure; responsiveness to investigations and suggestions; providing procedural due process, review, and comment; and/or testimony on proposed legislation relating to ASME's codes; standards; and/or accreditation, registration, and certification activities.

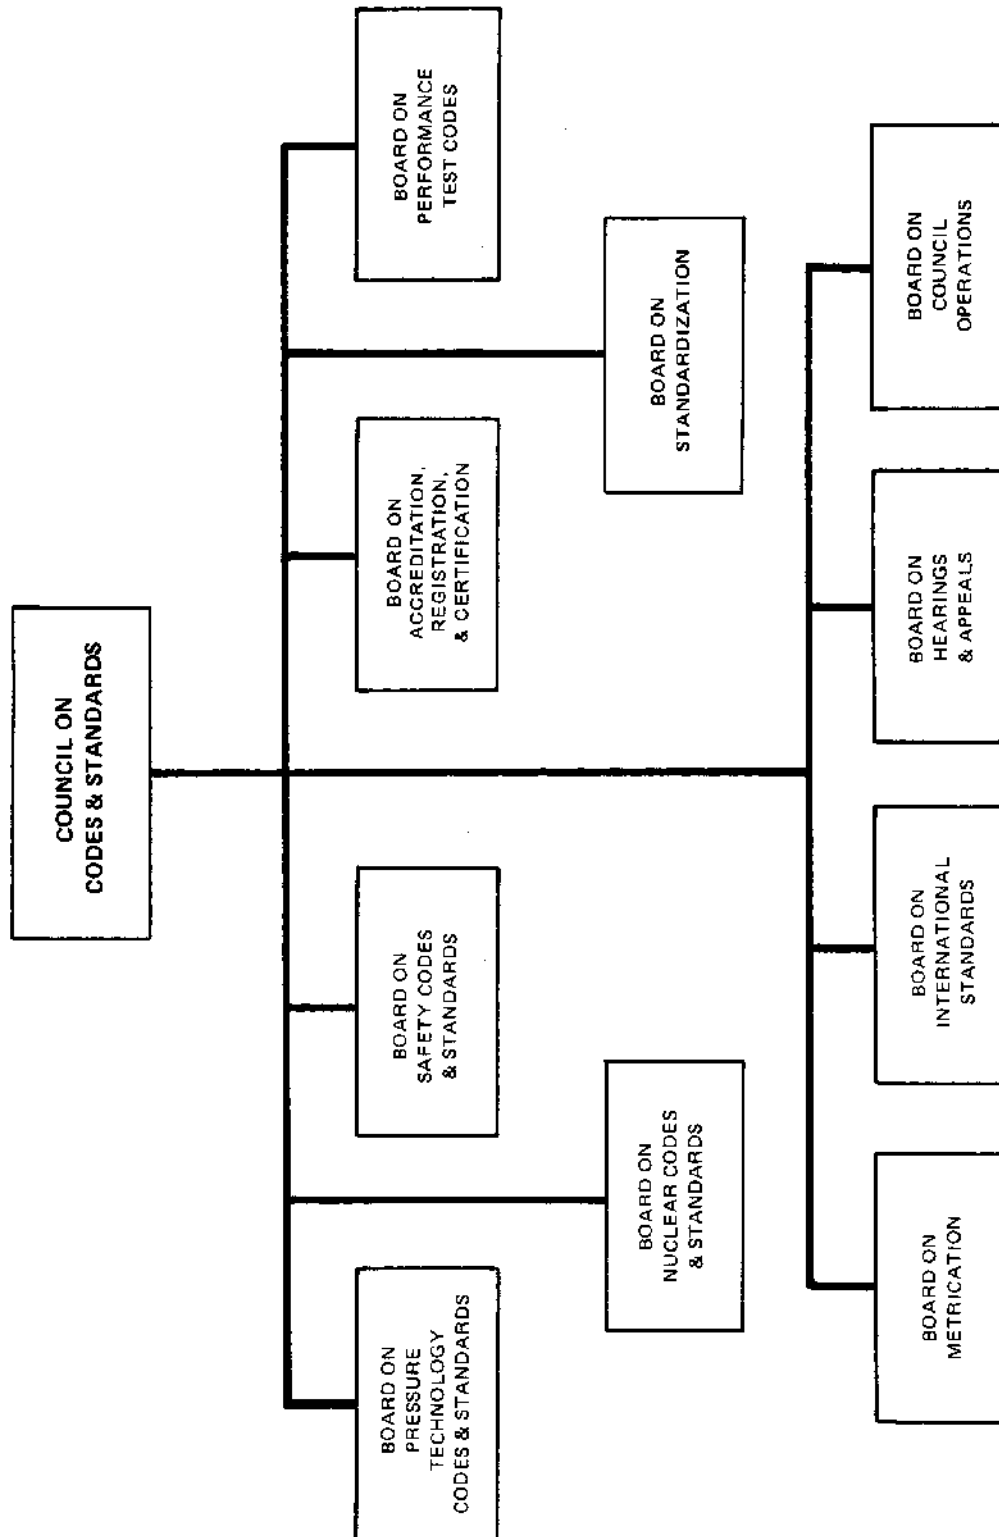

The supervisory boards (Accreditation, Registration, and Certification; Nuclear Codes and Standards; Performance Test Codes; Pressure Technology Codes and Standards; Safety Codes and Standards; and Standardization), within their respective scopes, have the following duties:

- to assess the need for codes; standards; and related accreditation, registration, and certification activities;
- to determine the necessary scopes of standards developing committees;
- to interface with the American National Standards Institute, Inc. (ANSI);
- to approve codes and standards on behalf of the Society;
- to recommend policy changes to the CCS;
- to interact with regulatory bodies.

ASME develops standards under the ANSI Accredited Organization Method. The supervisory boards have standards developing committees using this method. As part of the overall public service role of Codes and Standards, it is the role of the supervisory boards to assure that any document presented to the Society whose scope interfaces with that of an ASME committee is reviewed under the ANSI Canvass Method.

Included in this publication are lists of standards developing committees, arranged by board to which they report, and a listing of the ASME Codes and Standards Staff. For Society related codes and standards inquiries relative to the CCS, boards, standards developing committees, or accreditation and certification committees, the staff person indicated should be contacted. It is the responsibility of this staff to function within the parameters of B5.1.4 of the Society's Bylaws:

B5.1.4 The primary role of staff assigned to Boards and Committees will be to perform operations that are required to meet the objectives of the Board or Committee on a continuing basis. Working under broad lines of policy established by the Board or Committee, the staff will initiate programs, actively engage in the work, and make operating decisions necessary to carry forward the programs in a dynamic and efficient manner.

F. Lyons	Engineering Administrator Materials; building services piping; Honors and Awards	705-8540
D. S. Poulis	Engineering Administrator Components in nuclear safety related air and gas treatment systems for nuclear facilities; concrete reactor vessels and containments; nuclear operations and maintenance	705-8512

HONORS AND AWARDS

The following descriptions of each award bestowed by ASME Codes and Standards and the lists of award recipients are included for the information of present committee members and the continued honor of those responsible for the success we now enjoy.

CODES AND STANDARDS MEDAL

The Codes and Standards Medal is bestowed in recognition of outstanding contributions to the development of documents, objects, or devices used in any part of the national or international ASME programs of technical codification, standardization, and certification.

The award shall be made to an individual (or individuals in exceptional circumstances) who has served on ASME Committees or American National Standards Committees or International Standards Technical Advisory Groups administered by ASME. An individual need not be an ASME Member to qualify.

The award was established by the Society in 1976.

1977	William G. McLean	1987	Jack B. Levy
1978	Leonard P. Zick	1988	John H. Fernandes
1979	Joseph F. Sebal	1989	Howard F. Dobel
1980	George F. Habach	1990	Robert J. Bosnak
1981	Roy P. Trowbridge	1991	Arthur R. Machell, Jr.
1982	James W. Murdock	1992	Walter R. Mikesell, Jr.
1983	Walter L. Harding	1993	Wendell P. Johnson
1984	Melvin R. Green	1994	Oscar J. Fisher
1985	Paul M. Brister	1995	James R. Farr
1986	William E. Cooper		

PERFORMANCE TEST CODES MEDAL

The Performance Test Codes Medal is to be awarded to an individual (or individuals in exceptional circumstances) who has made outstanding contributions to the development and promotion of ASME Performance Test Codes, including the Supplements on Instruments and Apparatus.

The award was established in 1981 by contributions to the Performance Test Codes of the Society.

1984	Kenneth C. Cotton	1989	Frederick H. Light
	William G. McLean	1990	Karl G. Grothues
1985	James W. Murdock	1991	Robert Jorgensen
1986	John H. Fernandes	1992	Joseph S. Davis, Jr.
1987	P.H. "Pete" Knowlton Jr.	1993	Philip M. Gerhart
1988	Charles B. Scharp	1995	Silas L. Morse

J. HALL TAYLOR MEDAL

The J. Hall Taylor Medal is presented for distinguished service or eminent achievement in the field of codes and standards pertaining to the broad fields of piping and pressure vessels which are sponsored or undertaken by ASME. The scope shall include contributions to technical advancement and administration.

In 1965, by a bequest through the ASME activity in codes and standards, the Taylor Forge and Pipe Works established this award to commemorate the pioneering work of J. Hall Taylor in the field of standardization of industrial products and safety codes for their usage.

1966	Frank S.G. Williams	1979	John F. Harvey
1967	David B. Westrom	1980	Paul M. Brister
1968	Max B. Higgins	1981	Robert J. Cepluch
1969	Everett O. Waters	1982	George V. Smith
1970	Bernard F. Langer	1983	Lowell L. Elder
1971	James M. Guy	1984	William D. Doty
1972	William R. Gall	1985	Robert C. Griffin
1973	John D. Mattimore	1986	James R. Farr
1974	Jean E. Lattan	1987	Stephen A. Bergman
1975	Walter H. Davidson	1988	George E. Fratcher
	Frederick A. Hough	1989	Walter R. Mikesell, Jr.
	Joe J. King	1990	William R. Applett, Jr.
	Burton T. Mast	1991	Bernard W. Bace
	Andrew J. Shoup	1992	Maan H. Jawad
1977	James S. Clarke	1993	Clyde C. Neely
	Raymond R. Maccary	1994	Domenic A. Canonico
1978	Adolph O. Schaefer	1995	Guido D. Karcher

BERNARD F. LANGER NUCLEAR CODES AND STANDARDS AWARD

The Bernard F. Langer Nuclear Codes and Standards Award was established in 1977 in honor of B.F. Langer who was instrumental in the development of the rules for nuclear vessels.

Recognition of an individual(s) who has contributed to the nuclear power plant industry through the development and promotion of ASME Nuclear Codes and Standards or the ASME Nuclear Certification Program is made through the presentation of this award.

1978	William E. Cooper	1986	Edwin J. Hemzy
1979	William R. Smith, Sr.	1987	Robert L. Dick
1980	Wendell P. Johnson	1988	Edward F. Gerwin
1981	Lawrence J. Chockie	1989	William H. Miller, Jr.
1982	Guy A. Arlotto	1990	Edward L. Williamson
	Robert J. Bosnak	1991	T. Eugene Northup
	Robert B. Minogue	1992	Marcus N. Bressler
	G. Wayne Reinmuth	1993	Roger F. Reedy
1983	Spencer H. Bush	1994	Owen F. Hedden
1984	Floyd N. Moschini	1995	William G. Knecht
1985	Howard F. Dobel		

SAFETY CODES AND STANDARDS MEDAL

The Safety Codes and Standards Medal is presented to one or more individuals who have contributed to the enhancement of public safety through the development and promotion of ASME Codes and Standards or the ASME safety accreditation activity.

The medal was established in 1986 by the Council on Codes and Standards.

1987	Howard F. Silfin	1992	Edward A. Donoghue
1988	Oscar J. Fisher	1993	Robert L. Seymour
1989	William J. Stuber	1994	James D. Schell
1990	Oswald S. Carliss	1995	Zack R. McCain, Jr.
1991	Clyde A. Cobb		

DEDICATED SERVICE AWARDS

In 1983, the ASME Board of Governors approved the establishment of the Dedicated Service Award. Its purpose is to honor unusual dedicated voluntary service to the Society marked by outstanding performance, demonstrated effective leadership, prolonged and committed service, devotion, enthusiasm and faithfulness.

The award may be presented to selected individuals who have provided service to the Society for at least ten years.

1984	Norman R. Deming Edward F. Gerwin Philip A. Nicovich Warren Schultheis Philip S. Sizer William J. Stuber		Wilford L. Garvin Paul E. McKim Gilbert C. Millman Victor D. Petershack David A. Spera

BOARD ON NUCLEAR CODES AND STANDARDS

O10000000

Scope: To manage all ASME activities related to codes, standards, and accreditation programs directly applicable to nuclear facilities and technology. To manage the development of codes, standards, and accreditation programs developed by committees under its jurisdiction, including the approval and discharge of personnel of the committees. To approve for ASME all codes, standards, and accreditation programs prepared by committees under its jurisdiction. Approval by the board of a specific code, standard, or accreditation program shall be based on assurance that an ASME committee that developed the code or standard has operated under procedures that have been accredited as meeting the criteria for American National Standards. To assess the need for codes, standards, and related accreditation activities. To develop recommended policies for consideration by the Council on Codes and Standards. To develop recommended ASME positions with interfacing bodies, including regulatory agencies, on matters related to nuclear facilities and technology. To develop Society positions for proposed standards, which are directly applicable to nuclear facilities and technology, submitted under any nationally accepted method for developing voluntary standards. To assure that all committees within the scope of the board are providing procedural due process.

MAIN COMMITTEE OF COMMITTEE ON NUCLEAR AIR AND GAS TREATMENT EQUIPMENT

O10200000

Scope: To develop, review, maintain, and coordinate codes and standards for design, fabrication, installation, testing, and inspection of equipment for air and gas treatment for nuclear facilities. As used herein, gas treatment includes both HVAC and gas processing. HVAC is the moving and conditioning of air which is supplied, exhausted, or recirculated into and from an enclosed space to maintain a prescribed environment. These conditions include pressure, temperature, humidity, and contaminants. Gas processing is the transportation of gas and the separation, isolation, and disposal of its constituents by physical, mechanical, chemical, delay, electrical, and thermodynamic means.

**COMMITTEE ON QUALIFICATION OF
MECHANICAL EQUIPMENT USED IN
NUCLEAR POWER PLANTS**

O10800000

Scope: To develop and maintain codes and standards for the qualification of mechanical equipment to be used in nuclear power plants. Qualification is the demonstration of the capability of the equipment to perform its specified function(s) over the expected range of internal and external conditions it may experience during its service life, including aging of the equipment. This scope includes the following specific activities: develop and maintain standards on qualification of active mechanical equipment; coordinate with committees of other organizations that are preparing and maintaining qualification

standards; coordinate, from the perspective of qualification, with other ASME committees developing and maintaining construction and inservice codes and standards. The Committee on Qualification of Mechanical Equipment used in Nuclear Power Plants reports to the Board on Nuclear Codes and Standards and operates under the approved Operating Procedures and Practices for Nuclear Codes and Standards Developing Committees (OP & P) which are in accordance with and supplement the ASME Codes and Standards Developing Committee Procedures accredited by ANSI.

Staff Secretary, William O. Hays

PTC 1 GENERAL INSTRUCTIONS

P01020000

Scope: The agreed standard form, arrangement, and content of individual test

codes, intended as instructions to writers and revisions of codes; rules common to most test codes for planning, conducting, and reporting tests, not made mandatory by this code, but recommended for inclusion in individual codes and to be made mandatory therein; and recommendations and material informative to users of test codes.

Staff Secretary, William O. Hays

PTC 2 DEFINITIONS AND VALUES

P01030000

Scope: To develop an auxiliary document to all test codes, including standards, for terms, units, values of constants, and technical nomenclature. Where applicable, these are to be component parts of all individual test codes. All codes shall conform to the Code on Definitions and Values.

SUBCOMMITTEE ON NUCLEAR POWER (SC III)

N20070000

Scope: To develop, review, and maintain Section III, Division 1, of the Boiler and

Pressure Vessel Code. The rules of this section constitute the requirements for the construction of nuclear power plant items, such as vessels, storage tanks, piping, pumps, valves, core support structures, and component supports, for use in, or containment of, portions of the nuclear power system or containment system of any power plant. This scope is intended to cover new construction and includes consideration of mechanical and thermal stress due to cyclic operation. This scope excludes the construction of accessories or devices which are not pressure retaining parts or which do not act as core support structures or component supports. This scope excludes instruments or permanently sealed fluid filled tubing systems furnished with instruments.

SUBCOMMITTEE ON NUCLEAR INSERVICE INSPECTION (SC XI)

N20140000

Scope: To develop, review, and maintain Section XI of the Boiler and Pressure Vessel Code. This section provides rules for the examination, testing, inservice inspection, evaluation, repair and replacement of components and systems in an operating nuclear power plant. This section covers light-water cooled, gas-cooled and liquid-metal cooled nuclear power plants. The rules of this section constitute requirements to maintain and operate a nuclear power plant in a safe manner.

**BOARD ON SAFETY CODES
AND STANDARDS**

L01000000

Scope: The management of all ASME activities related to codes, standards, and accreditation and certification programs directly applicable to safety codes, safety standards, and related accreditation and certification activities as designated by the Council on Codes and Standards. The codes and standards developed by groups managed by the board are intended to be submitted to the American National Standards Institute, Inc., to become American National Standards.

**A13 SCHEME FOR THE
IDENTIFICATION OF PIPING SYSTEMS**
L01020000

Scope: Identification of piping systems, in industrial and power plants, which are not buried in the ground, and with special reference to personnel hazards, including conduits for the transport of gas, liquids, semiliquids, or fine particles of dust, i.e., dust in a dry form (not in a slurry) of less than 300 microns in size. The transported material can be flammable, combustible, or corrosive. This standard is also

recommended for pipe identification in commercial and institutional installations and in buildings used for public assembly.

A90 SAFETY STANDARDS FOR MANLIFTS

L01070000

Scope: The construction, maintenance, inspection, and operation of manlifts in relation to accident hazards to employees. Manlifts covered by this scope consist of platforms or brackets mounted on or attached to an endless belt, cables, or chains, operating in a substantially vertical direction, and being supported by and driven through pulleys, sheaves, or brackets at the top and bottom. These manlifts are intended for the conveyance of persons only. It is not intended that this scope cover moving stairways, elevators with closed platforms, "paternoster" elevators, gravity lifts, or conveyors used only for conveying materials.

B15 SAFETY STANDARDS FOR MECHANICAL POWER TRANSMISSION APPARATUS

L01080000

Scope: Protection of people from the hazards associated with equipment used in the mechanical transmission of power, which equipment has been installed and is operating in the intended use. The entire power train is included, comprising the sources of mechanical power, the associated and intermediate equipment, and the driven machines up to but excluding the point(s) of operation of locomotion. Units in such power trains include but are not limited to engines, motors, reducers, shafts, belts, sheaves, pulleys, gears, chains, sprockets, cables, clutches, cams, pistons, cranks, flywheels, counterweights, and other revolving, oscillating, reciprocating, or other moving parts.

B20 SAFETY STANDARDS FOR CONVEYORS AND RELATED EQUIPMENT

L01100000

Scope: The design, construction, installation, maintenance, inspection, and operation of conveyors and conveying systems in relation to accident hazards. Conveyors covered by this standard include such items as power conveyors, gravity conveyors, pneumatic tubes, skip hoists, vertical reciprocating conveyors, and power unloading scoops, except as provided in the following paragraph. This standard does not apply to industrial powered trucks, tiering machines, cranes, derricks, hoists, power and hand shovels, bucket drag lines, moving stairways, dumbwaiters, manlifts, and platform elevators designed to carry passengers or the elevator operator.

B40 SPECIFICATIONS FOR PRESSURE AND VACUUM GAUGES

C28000000

Scope: The preparation and promulgation of standards for pressure and temperature devices employing open loop mechanical (nonelectrical) sensing elements, thereby providing for the maximum interchangeability between devices with respect to function, form, and fit. The devices covered use sensing elements which generate a displacement and force which may be used for indicating the pressure or temperature variable by analog and digital transduction and/or the switching of an electrical circuit. The standards prepared by the committee should include, where applicable, nomenclature, definitions, capacity rating, types of enclosures, sizes, mounting, means of indication or display, graduations, units of measure, types of sensing elements and connections, methods of expressing and verifying allowable errors, installation, and protective and/or auxiliary attachments application and use.

SRB SLEW RING BEARINGS

C84000000

Scope: The scope of this committee's work will be to produce a "Design Guide for Slew Ring Bearings." An intent of such a guide is to increase the user's knowledge of this product and its application so that user and manufacturer can interface most effectively.

This document will standardize certain symbols, definitions, load ratings or capacities as well as acceptance and application criteria. Topics of internal bearing design, manufacturer, heat treatment and material will be covered in addition to critical application parameters such as mounting bolts, supporting structures, gears and other supporting equipment and devices.

Y14 ENGINEERING DRAWING AND RELATED DOCUMENTATION PRACTICES

C64000000

Scope: The development and maintenance of national standards for defining and documenting a product through out its life cycle and related certification activities. This shall be accomplished by: 1) Recognizing the continuing need for existing standards regardless of the source medium (e.g. paper, film, and digital) or method of preparation (e.g. manual or computer generated). 2) Providing standardization where a variety of practices exist within industry and government. 3) Providing standards for new concepts and technologies; and 4) Supporting and coordinating development and harmonizing of standards with responsible standardization bodies, including ANSI, ISO, and government agencies.
